

West Virginia School Health Technical Assistance Center

Please join us Friday, October 31, 2014

from 2:30-3:30 p.m.

for a free webinar on

Diabetes in Schools

The standards of care for students with Type I Diabetes (T1D) can be complex and individualized. West Virginia Public Schools have seen a steady increase in students diagnosed with T1D. Learn from a pediatric endocrinologist how to provide the basic standards of care for all students with T1D. Insulin pump therapy is a common delivery mechanism for insulin to students with T1D. The webinar will discuss basic functions of insulin pump therapy. A new support for trending blood sugar readings is the Continuous Glucose Monitor (CGM). This webinar will discuss the utilization of a CGM for trend data to successfully manage diabetes.

This training is offered only via WebEx (no conference call lines will be available). **The Webinar is FREE but you must register in advance.** We are limited to 100 WebEx participants, so please **register early** and plan for group access when able.

**Registration Link, CEU Information and Presenter Bio
are available on our webpage:**
